

*Redefining the way you experience sound.™*

## **PRESS RELEASE**

**FOR IMMEDIATE RELEASE**

### **RBH SOUND BOWS NEW SURROUND MODEL**

*New Surround Channel Speaker to Enhance the Home Theater Experience*

**LAS VEGAS, NV – CONSUMER ELECTRONICS SHOW – JANUARY 8-11, 2007 – VENETIAN SUITE 29-318** – RBH Sound, a leading speaker manufacturer in the custom installation industry, announces the newest addition to their highly popular MC Series, the MC-44C. The MC-44C is a speaker designed specifically for use as the rear effects channels in today's surround sound systems. RBH designed the MC-44C to provide a timbre-matched surround channel consistent with the high value the MC Series is known for.

The MC-44C features RBH's exclusive aluminum cone technology, employing two 4-inch woofers and two 1-inch tweeters in a bi-polar configuration; thus presenting diffused higher frequencies and providing solid reproduction of lower frequencies. The benefit of this design is the speaker's ability to reproduce high performance surround channel information from a position which cannot easily be located by the ear.

*"The demand for higher performance surround channels has increased with the proliferation of seven-channel home theater receivers." remarked Gary Tanner, RBH Sound's Director of Sales. "We feel the MC-44C's unique surround capabilities will provide our dealers with the performance and value they require to create even better A/V and surround systems for their clients."*

The MC-44C is available in the MC Series' black-stained oak veneer and also features RBH's proprietary Resonance Damping Alloy Baffle™ (RDAB) which functions to dampen cabinet vibrations and minimize tweeter diffraction. Integrated key-slot mounts are provided on the back

of the MC-44C cabinet, allowing for fast and secure wall mounting. With a recommended power of 50 to 150 watts, a frequency response of 100Hz—20kHz  $\pm$ 3dB, and a weight of only 11 lbs, the MC-44C is sure to please the most finicky home theater aficionado.

The MC-44C measures 9.5”H x 10.5”W x 6”D, has a suggested retail price of \$959.99/pair and is available now.

#### About RBH Sound

Since 1976, RBH Sound has been designing, engineering and crafting high-performance loudspeaker systems, delivering superior acoustic reproduction at sensible prices.
