

MC-6DB

IN-WALL SPEAKER

Designed to be used for home theater surround channels, the MC-6DB is capable of either bi-polar or di-polar modes. These modes optimize the sound from rear and rear-side effects channels to provide exceptional surround configuration and performance. The sound contour of the 1-inch aluminum dome swivel tweeters and 6½-inch aluminum cone woofer can be custom tailored through the use of built-in woofer and tweeter level switches.
